

## iSMP Companion

### A powerful next generation POS designed for in-store mobility

*By pairing a tablet or a smartphone with the iSMP via Bluetooth, PayEx offer a unique Smart Mobile Point-of Sale (POS)*

#### Compatible with all leading mobile operating systems

The iSMP Companion connects via Bluetooth to any iOS, Android or Windows-based tablet or smartphone. By offering the most advanced payment capabilities, it turns a tablet or smartphone into a Smart Mobile POS. As a complement to the integrated versions of the iSMP for iPhone® & iPod touch®, the payment companion version provides the functionality that ensures the iSMP range addresses the diversity & growing number of mobile operating systems and form factors.

#### Nordic payment platform

The iSMP Companion accepts all forms of card payment. It is based on Telium 2, Ingenico's highly secure payment platform.

The iSMP meets all security & payment standards: EMV, PCI PTS, Paypass™, payWave.

Accept all payments methods including EMV Chip & PIN, magstripe and NFC/Contactless.

Connect the iSMP Payment Companion to iOS, Android™ or Windows®-based tablets or smartphones via Bluetooth®.

Open up a wide range of opportunities for Retail, Hospitality, Transportation & other mobile businesses.
